NEW DELHI: As a significant move towards improving airport security and making air travel more convenient for passengers, the Central Industrial Security Force (CISF) conducted a high-level "Functional Workshop of Airport Sector" on Friday at its Airport Sector Headquarters, New Delhi.

The workshop had the participation of senior officials from the Ministry of Civil Aviation, Directorate General of Civil Aviation (DGCA), Bureau of Civil Aviation Security (BCAS), Airport Authority of India (AAI), Bureau of Immigration, Delhi Police, Special Protection Group, National Security Guard, DIAL, and major carriers like Air India Express and Indigo.

The workshop sought to tackle the changing security issues in the aviation industry and underlined the importance of smart, holistic solutions that strike a balance between security and passenger convenience.

All discussions centred around employing cutting-edge technology such as facial recognition, automatic number plate recognition, biometric access, and artificial intelligence to automate security processes, alleviate congestion, and enhance response time.
